George Moustakas

Web Developer - Software Engineer

Greece

Summary

Here is a quote i LOVE: When people tell me "You're going to regret that in the morning", I sleep in until noon because I'm a problem solver. I love many things in my life but the top three are Programming, Problem Solving and being a Paramedic (Currently Studying to one!). My Programming Language of choice is Python, almost everything i do is written in Python along side with a web framework called Flask. Check My Website at gemgr.github.io to learn more about me.

Experience

Self-employed
Web Developer - Software Engineer
February 2016 - Present
Kastoria, Greece
